West Des Moines eNewsletter

Special Edition!

**Help Faster Internet
Take Root in
West Des Moines!**

It's time to live in the future

You may have heard that the City of West Des Moines is partnering with internet providers (including Google Fiber) to create a conduit network for faster, more reliable internet service.

Best of all, you can **say yes now**, and we'll bring this network right to your door — at no cost. Then simply choose the internet provider you want.

Faster internet means more competitive schools and more productive businesses. It will be easier to work from home. And it will provide an increased opportunity for virtual healthcare.
